DETAILED ACTION

Claim Rejections - 35 USC § 103

1. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

2. Claims 1, 2, 4-11, 13-15 and 20-24 are rejected under 35 U.S.C. 103(a) as being unpatentable over either Dhaemers in view of Jewell. Dhaemers discloses the claimed invention except for solar power. Jewell teaches that it is known to provide solar power to an animal dryer as set forth at paragraph [0018]. It would have been obvious to one having ordinary skill in the art at the time the invention was made to replace the power of Dhaemers with solar as taught by Jewell as taught therein. As to claims 5 and 6, it is well known to provide the solar collector on the fan or offset thereof; especially, in view of the fact that these are the only two possible locations for the collector. As to claims 14 and 15, it would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the tube with a filter in view of the teaching in the Background of the Invention in order to remove odors from the air.

3. Claim 12 is rejected under 35 U.S.C. 103(a) as being unpatentable over either Dhaemers in view of Jewell as applied to claim 1 above, and further in view of Kim. Further, Dhaemers discloses the claimed invention except for the claimed manifold. Kim teaches that it is known to provide a drying apparatus with a hollow main conduit as set forth at column 5, lines 21-23. It would have been obvious to one having ordinary

skill in the art at the time the invention was made to provide the air distributor of Dhaemers with the manifold, as taught by Kim in order to provide a plurality of auxiliary conduits.

Claim Rejections - 35 USC § 102

4. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

5. Claim 16 is rejected under 35 U.S.C. 102(b) as being clearly anticipated by either Dhaemers.

Election/Restrictions

6. Claims 3 and 17-19 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on September 16, 2005.

Conclusion

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
